Phila June 6th 1885

Hon A London Snowden
Supt U S Mint

Dear Sir

I would ask you for a new Injector, ours now in use is very much out of repair and is to small.

At the time it was put in (about 27 years ago) it was large enough to answer all purposes, but now it is to small as our work has increased very much since that time, in case of our pumps giving out our injector will not supply the boilers.

Therefore I would recomend the procuring of L Schutte & Co No 8 Injector

All of which I submit for your consideration

I remain your most
Obedient Servant
